ABOUT US

We are an innovative asset manager, creating intuitive, transparent and rules-based strategies. Our work is based on centuries of traditional data, proprietary alternative data and rigorous research. We are a recognized thought leader in quantitative management and ESG.

INVESTMENT STRATEGY

Companies are increasingly valued according to intangible assets, which traditional financial metrics do not adequately account for. They carry enduring value that enables companies to survive, and even thrive, through downturns as well as strong market conditions.

This core active strategy relies entirely on alternative data to construct a systematic model. We select 50-60 large companies from developed markets outside the U.S. as well as emerging markets based on the quality of key intangibles, repeatedly tested for their signal strength. The strategy has a differentiated low turnover and high active share, aiming to outperform the MSCI ACWI ex U.S. benchmark by more than 300 bps annually, over a market cycle.
